BEDROOM

Is there anything more wonderful than slipping between the cool sheets of a freshly made bed and soaking up their clean freshness before falling asleep? The Luhta Home collection has four different types of cotton to choose from. The harmonious color scheme brings tranquility to your bedroom. Sweet dreams!

COTTON

Cotton is an easy-care and breathable natural fiber. Cotton is virtually static-free and can withstand frequent washing even at high temperatures. The cotton sheets in our collection are made from high-quality fabric that feels comfortable on the skin and ensures a good night's sleep.

PERCALE COTTON

Percale cotton sheets are delightfully luxurious and made from very high-quality fabric that keeps its shape and quality year after year. Percale is a tightly woven, cool to the touch, and easy-care type of fabric, and percale sheets only improve with every wash. These sheets bring joy for a long time.

SATIN COTTON

Satin cotton is a specific type of weave. Satin cotton duvet covers have a nice glimmer with a texture that is luxuriously smooth and soft, making them ideal for the everyday festive moments. Satin cotton is often recommended for people with allergies because it is tightly-woven and dust-free.

ORGANIC PERCALE COTTON

The Luhta Home Organic Percale Cotton product family is made from luxurious, stonewashed, 100% organic cotton percale. Organic percale cotton is a soft, durable, natural material, cultivated without environmentally harmful chemical fertilizers or pesticides. Its production process is certified and its origin is traceable. The product dyeing and printing methods are based on the use of water-soluble dyes.
