friendsheep — forever —

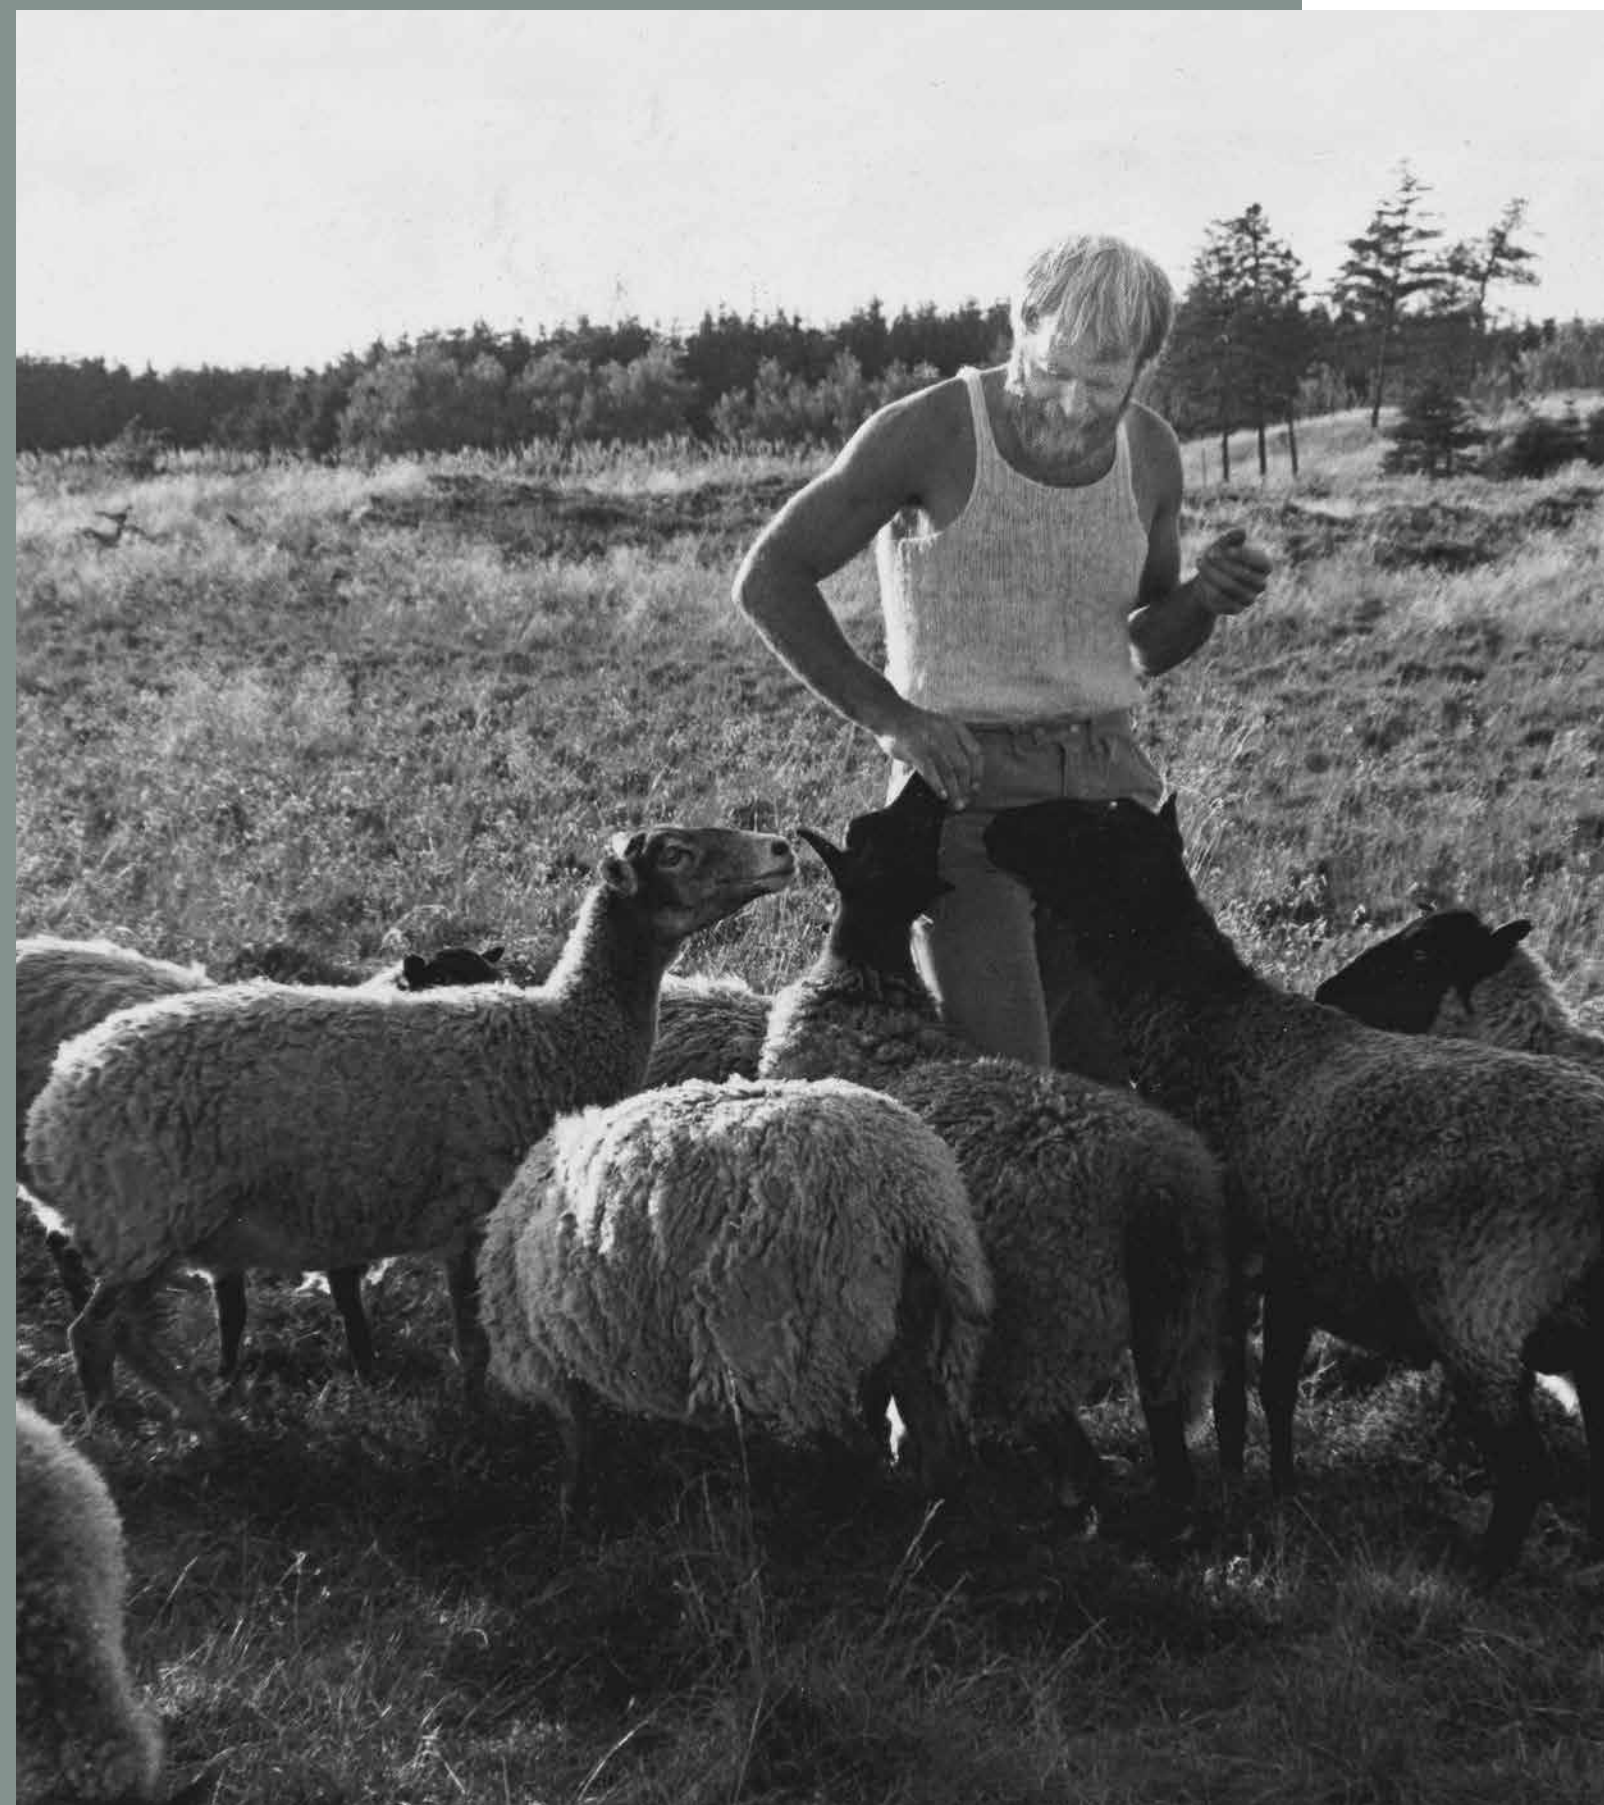

In 1993, Danish mother Nanny Glerup hand-crafted a pair of slippers using the natural wool from her own Gotland sheep. So well were the slippers loved by family and friends, that Nanny's hobby soon became a small-scale production – two pairs a day!

That was the beginning of glerups.

Nanny and her husband Ove worked hard over the years to improve glerups. Many machines and tools were invented and trashed to keep up with growing demand for this indoor shoe.

Today, glerups “addicts” all over the world get their daily “fix” of 100% pure, natural wool that is still crafted with love and care from the sheep to your foot.

We hope you enjoy the all year comfort of your glerups.

– True Danish – craftsmanship

100% PURE, NATURAL WOOL

Wool is a fantastic material. Many know the benefits of wearing wool during the winter. You can wear glerups 365 days a year, and here are some good reasons for wearing wool – even in the hotter months.

1.

Wool is naturally temperature-regulating, and can be used both when the weather offers cold and heat

2.

Absorbs moisture and keeps your feet dry

3.

Wool is a natural odor and bacteria inhibitor

4.

Comfortable and soft to wear – itch-free

5.

100% pure, natural wool – good for human, nature and animal

Wool is a natural product with self-cleaning properties. This is due to the natural fat of the wool fiber, lanolin. As the sheep get wet, a process is created between the lanolin and the sheep's natural basic salts from perspiration, which together form a natural soap that cleans the wool glerups benefit from the same characteristics.

We recommend using your slippers without socks.

Bare feet are always best for glerups!

— Unforgettable — moments

FROM FARM TO FOOT

After the sheep are sheared, glerups wool goes through many processes and hands to ensure the highest quality and a perfect fit.

glerups started with wool from the family's own Gotland sheep.
But at glerups, we never stand still!

Over the years glerups perfected the wool mix by blending Gotland wool with soft quality wool from New Zealand farmers. These farmers meet our high standards for consistent quality and humane animal welfare.

We work with our farmers every step of the way and follow each pair of glerups from the sheep to your feet.

— Our DNA —

LEATHER LABELS ARE MADE OF LEFT OVER LEATHER PIECES

With values of quality craftsmanship and deep respect for human, nature and animal, the vision is to work in line with these values from farm to foot. This means, we continuously work towards optimizing production and inventing the right technology to limit waste.

For instance, our leather labels are made of left over leather pieces from our production and we love the idea of reducing waste and especially when it also is an elegant design upgrade.

Designed in Denmark – Produced on our own factory in Romania

A hobby that grew

- 2022**  We will build a new office- and warehouse in USA and the new factory in Romania is a reality.
- 2021**  The success continues. glerups are now sold all over the world – from Japan and Europe to New Zealand, Canada and USA.
- 2018**  25 years since the first pair of glerups. The color Forest is introduced – inspired by the surroundings around Nanny and Ove's home.
- 2015-2017**  glerups Inc. is established in the USA and a new production building in Romania of 2,800 m² is on the drawing board.
- 2005**  While widening our geographic presence, we decide to trim the collection and focus on slip-ons, shoes and boots.
- 2000**  Nanny is now in her 60's and works with innovation and to secure that the glerups DNA is solidly integrated into the company.
- 1995**  Nanny sees the machine "The Old Lady" and immediately recognizes the potential. "The Old Lady" will increase production capacity.
- 1993**  53 years old, Nanny crafts slippers for family and friends made from the natural wool of the Gotland sheep.
- 1985**  They buy Thasdalgaard in Northern Jutland, Denmark.
- 1970's**  Nanny Glerup enrolls in a felting course where she makes a pair of boots for her husband Ove.

Danish hygge

[HOO GA]

1.
The art of building sanctuary and community
of inviting closeness and paying attention to what
makes us feel open hearted and alive.
2.
To create well-being. Connection and warmth.
3.
A feeling of belonging to the moment and
to each other.
4.
Celebrating the everyday.

Please share your glerups moments with us

The Soles

FOR INDOOR AND THE COZY BREAK OUTDOOR

LEATHER SOLES

Our chrome free calf skin soles are soft and have strong durability – the hides we use are chosen to match our demands and glerups DNA. We aspire to the highest quality and only the best is good enough for glerups.

glerups with leather sole are for indoor use. Wear them at home and bring when travelling or visiting friends and family. Enjoy the comfort and relax & recover after a hectic day.

Also perfect for the home-office look or as a gift item.

You can clean the sole with a leather brush.

Please be careful – the leather soles may be slippery on wet and icy surfaces such as tile.

NATURAL RUBBER SOLES

Our soft natural rubber soles are designed and constructed to allow a free movement of your feet. The special pattern provides a "better grip".

The natural rubber comes from the idea of producing soles the same way that the indigenous people of South America did. They used the sap of the Hevea-tree for manufacturing. The sap is collected by cutting thin strips of bark from the tree and allowing the latex substance to be tapped. This harvesting does not weaken the tree, far from it, it actually helps it flourish. The tapped sap is constantly being reproduced by these trees and they are allowed a sufficient break for regenerating. After this period, the latex tree is tapped again. Botanists say that this process of tapping is known to strengthen the resistance of the tree.

glerups with natural rubber sole are mainly for indoor use, but you can use them outdoor for daily errands such as taking out trash, a short walk with the dog or going to the mailbox. You can also use glerups with natural rubber sole when travelling and they are perfect before and after activities, when your feet need to relax and deserve some pampering. Also perfect for outdoorsies as the camp, shelter, hammock and glamping gear to bring and as a gift item for family and friends.

Please be careful – the natural rubber soles may be slippery on wet and icy surfaces such as tile.

The Innersoles

CREATE THE GLERUPS FEELING

100% PURE, NATURAL WOOL

Create the glerups feeling and comfort in your boots, sneakers and shoes with our innersoles in 100% pure, natural wool. Boost the wearing comfort and pamper your feet.

glerups 

How to clean and care for your glerups

1.

Since wool has a natural ability to self-clean, your glerups will stay fresh if you simply air them out and allow them to rest.

2.

To remove stains we suggest that you gently clean on the stain with a light wet cloth and wool detergent. You may have to repeat the process a few times, but make sure that you always leave the slippers to dry before starting over again.

3.

Vacuum or blow your glerups clean of dust. Leather soles can be brushed and cleaned with a leather brush. Rubber soles can be wiped with a wet cloth – make sure that they get some time to dry after cleaning.

4.

Your glerups usually shed within the first 3-4 weeks of wear giving you a long-lasting comfortable feel for years to come. This is normal due to the natural treatment of our wool. Simply remove the shedding fibers and discard as desired.

5.

Please be careful – natural rubber or leather soles may be slippery on wet and icy surfaces such as tile.

HOW TO MEASURE THE LENGTH OF YOUR FOOT PROPERLY

1.

Place the heel against a wall.
2.

Measure from the wall to the tip of your longest toe.
One foot is often longer than the other, so measure the longest foot.
For children add 10 mm to the measured length, leaving room for small feet to grow.
3.

Use the size guide to find the right size.
